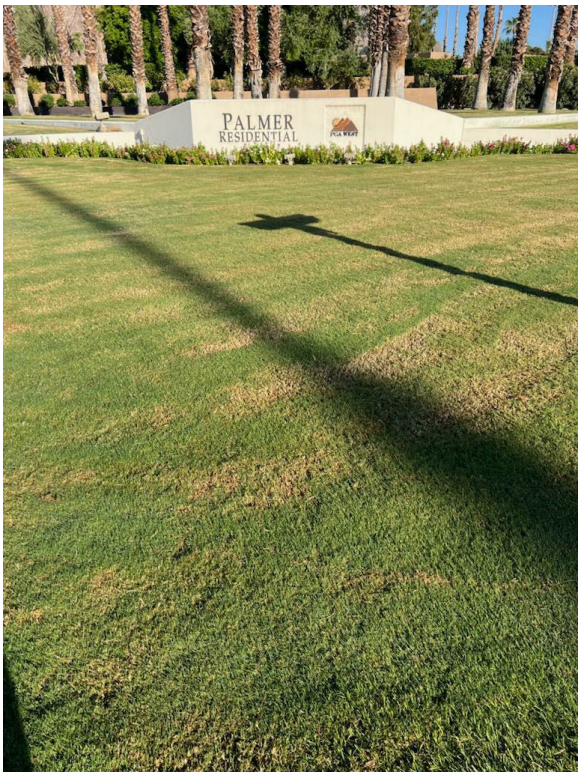
Date August 2024 Re:

Monthly Update

Grass: We will begin to lower mow cut to begin prepping for scalping. During this period of scalping we will gradually reduce the irrigation, to allow the summer grass (Bermuda Grass) to go dormant for the winter. Overseeding will be taking place in October – exact time will be determined on the weather. By cutting back on the irrigation and cutting the grass shorter, you may experience more dust than normal, so please keep your windows and doors closed if they're working in your area. Towards the end of the month, please also expect brown patches of grass throughout the community.



Shrubs: Minor natural trim on shrub material is ongoing where possible.

Weeds: Nutgrass spraying was completed last month. Weeds are being controlled with permitted herbicides and manual removal.

Irrigation: Efficient water use continues to be a main priority. Currently the water times are 1x per day 6 days a week. Last month we repaired about 9 mainlines and 3 valve replacements.
